# PUBLIC HEARING FACT SHEET

## WASTEWATER TREATMENT FACILITIES PLAN AMENDMENT

### VILLAGE OF LOMIRA

---

#### A. WHAT IS THE VILLAGE WORKING ON?

The Village has retained MSA Professional Services, Inc. to develop an Amendment to the Village's existing Wastewater Treatment Facility (WWTF) Facilities Plan. The plan was originally created in 2018 and identified upgrades required for the WWTF, which were completed in 2022. Additional upgrades at the WWTF are now required due to new regulatory changes and to replace treatment equipment which has been operating poorly.

The Facilities Plan Amendment (Amendment) includes the following:

- Confirmation that the background conditions established in the 2018 Facilities Plan still apply
- Projection of flows and loadings out to the year 2050
- Evaluation of alternatives to provide the process of Disinfection at the WWTF
- Recommendation of the most cost-effective alternative
- Review of potential project funding sources and potential principal forgiveness
- Anticipated impact to Village sewer user rates
- Schedule for moving forward with the project

#### B. WHY ARE UPGRADES NEEDED?

- The WWTF is permitted to discharge treated water (effluent) to Lomira Creek under a permit document. The permit is issued and managed by the Wisconsin Department of Natural Resources (WDNR). The Village must always remain in compliance with the requirements of the permit.
- The Village's WPDES Permit No. WI-0020532-10-0. The current permit was reissued on October 1, 2024. The permit is effective for a five-year period through September 30, 2029, after which a new WPDES permit will be issued. The WPDES Permit is publicly available online.
- Effluent discharge limitations for *Escherichia coli* (*E. coli*) were introduced in the Village's current permit. These limits were not included in previous WPDES permits. The WWTF currently does not have a treatment process capable of treating water below the permitted *E. coli* limit.
- The Village was not aware that the *E. coli* limits would be added to the permit while the 2018 Facilities Plan and subsequent construction project was occurring.
- Four blowers were installed during the recent WWTF upgrade project. Blowers provide air to the treatment process which is essential for meeting other WPDES permit limits. Numerous mechanical and performance problems with the blowers have occurred since installation. These problems have been attributed primarily to defective workmanship from the manufacturer. The Village has made the decision to replace the blowers entirely with new blowers provided by a new manufacturer.

**C. WHAT IS BEING RECOMMENDED AND HOW MUCH DOES IT COST?**

The list below summarizes the recommended upgrades. A detailed cost estimate was prepared and included in the Amendment. The cost estimate includes all capital costs and professional services (design, funding, and construction related services). It also includes a contingency to account for any unknowns prior to the design and bidding of the project.

**Estimated Capital Cost: \$1.71 million**

- New UV Disinfection Process
  - Concrete, water-tight structure with approximate 45’ x 15’ footprint
  - UV Disinfection System technology, controls, and installation
  - Utility work to integrate UV Disinfection System within WWTF
  
- Replace Aeration Blowers
  - Remove four existing aeration blowers
  - Install four new aeration blowers
  - Integrate the new blowers within WWTF

**D. WHERE ARE WE GOING TO GET THE MONEY TO PAY FOR THIS?**

- The Village currently plans to utilize WDNR Clean Water Fund (CWF) to finance the proposed upgrades. The CWF program was previously used to finance the recent upgrades at the WWTF.
  
- The CWF loan will likely be a 20-year term. It is possible that the Village may be eligible to receive principal forgiveness for up to 25% of the project costs.
  
- To pay the debt service on the required loan, the Village would need to increase sewer user rates.
  
- The approximate rate impact for the proposed upgrades is \$7-\$10 per month per equivalent meter.

**E. WHAT IS THE PROPOSED SCHEDULE?**

A proposed schedule is included in the table below.
