

February 7, 2024

Dear Village Residents and Businesses,

Each year, the Village of Lomira is required to perform preventative maintenance and cleaning of sections of the sanitary sewer mains. The sewer mains are located underneath the roadway. Speedy Clean Drain and Sewer, Inc. will professionally clean and inspect the mains tentatively during the week of February 12<sup>th</sup>. Please check the Village website for updates at [www.villageoflomira.gov](http://www.villageoflomira.gov). The jetting process will improve the sewer's performance and significantly reduce the chance of future sewer backups and related problems.

The cleaning process causes a vacuum suction in the sewer. This will not affect most homes and businesses, but some may be affected that have inadequate or partially blocked drain vents. The vacuum may cause "P-traps" (the little S-shaped bend in the pipe under sinks and drains) to be sucked dry. Should you notice a sewer smell resulting from this, run some water in your drains to refill the P-traps. It is recommended to put the toilet seat(s) down, and cover floor drains with car mats on the days that the sewer cleaning is scheduled. This will minimize any possible splashing of the P-trap water in poorly vented homes. Please take these precautions during the week of February 12<sup>th</sup>.

Please direct any questions or concerns to the Public Works Department at 920-269-8155.

Please see the reverse side of this letter for a map showing the areas of the Village (in blue) that will be jetted: sections of Third Street, Milwaukee Street, Church Street, Pleasant Hill Avenue, Main Street, and East Avenue.

Thank you for your cooperation.

Regards,

Nick Roskopf

Director of Public Works

Office: 920-269-8155
